

 **HOOFWAY**
EQUINE STOMACH PUMP

EFFICIENT • RELIABLE • AUTOMATIC

Hoofway is the leading manufacturer of the automatic colic pump that safely administers NG intubation of Colic with its controlled low pressure delivery. At Hoofway, we prioritize the well-being of horses and the ease of veterinary practitioners.

Hoofway was formed in 2019 with ISO9001:2015 standards to introduce new innovative medical devices for equine veterinarians that makes their practice and treatment easier. The Hoofway Colic Pump is designed, developed, and tested in Southern California.

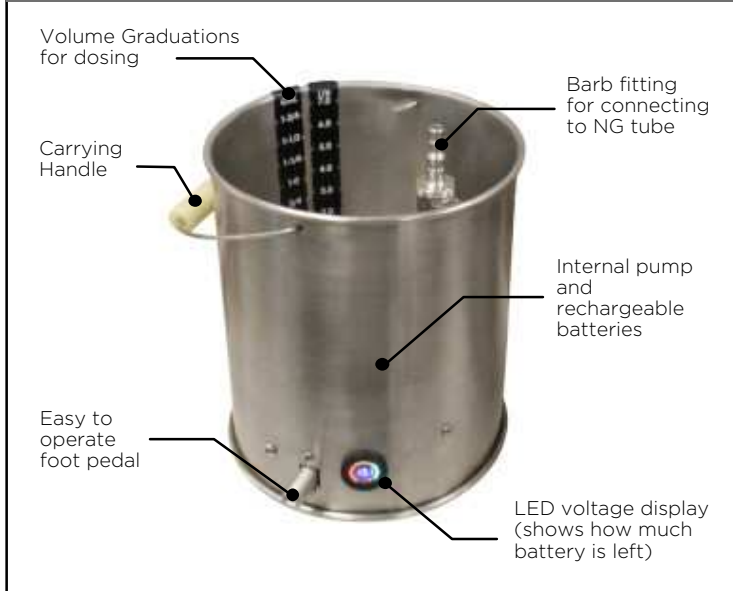

Why Hoofway?

Because the Hoofway Colic Pump is the safest colic treatment device that you could use for your equine patients. The automatic equine colic pump offers many advantages for the equine practitioner, such as the ability to deliver fluids to horses at pressures five times lower than manual pumps. Other features include an automatic shut-off mechanism that stops the pump after ten seconds to prevent over-administration. It instantly turns off with the foot pedal release. Versatile in pumping water, mineral oil, psyllium, and Epsom salts at 1 gallon per minute, it features a water and oil-tight barb fitting for the NG tube. The pump is constructed from tough stainless steel and offers 35 procedures per 2-hour charge, ensuring reliable equine healthcare.

At Hoofway, our team of engineers determined to offer a better way to treat colic. Once you try the Hoofway Pump you won't ever administer another colic treatment without one!

AUTOMATIC EQUINE STOMACH PUMP

Part number: HW100-101

Why is the Hoofway Pump the safest colic treatment device for horses?

SPECIFICATIONS:

- It delivers fluid at pressure 5 times less than a manual pump
- Gives the Practitioner the use of both hands
- Has an automatic shut-off after seconds to eliminate over administration
- Will shut off instantaneously with the release of the foot pedal
- Can pump water, mineral oil, psyllium, and epsom salts
- Pumps at 1 gallon per minute
- Has a water and oil tight bar fitting for NG tube
- Constructed out of tough stainless steel
- 35 procedures per charge (Charge time 2 hours)

Technical Specifications

Weight of device	12 Lbs.
Width	9.963 inches
Length	10.863 inches
Material	Stainless steel

HW100-101 and Accessories

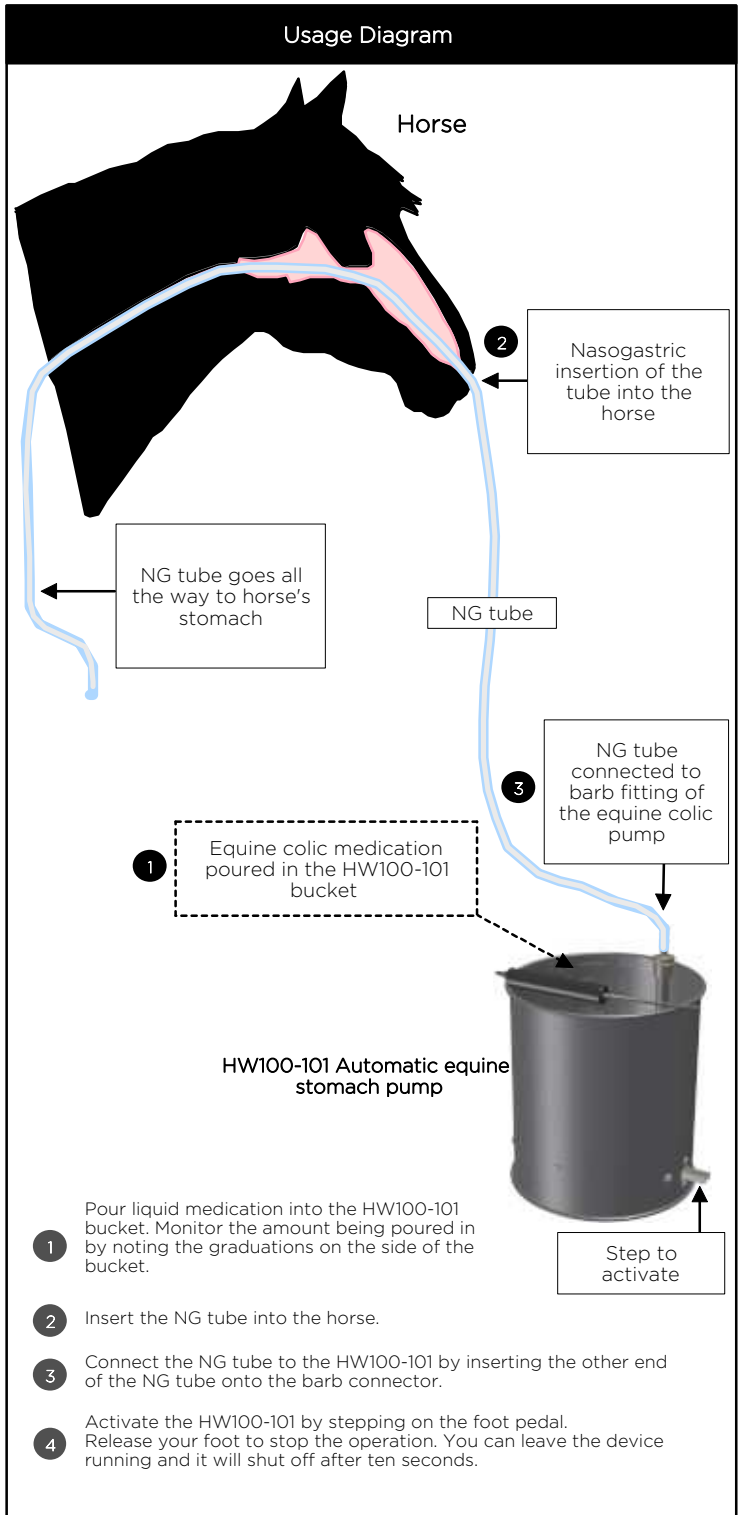

Our Hoofway pump accessories optimize the functionality and versatility of our colic pump. From specialized tubing to precision-engineered barb fittings, each accessory is crafted to seamlessly integrate with our pump, ensuring precision and efficiency in every procedure.

Guide:

- 1 Large PVC stomach tube
- 2 5/16" joint hose barb for stomach tube OD 1/2"
(P/N HW170-003) (sold separately)
- 3 Dual joint (3/8", 1/2") hose barb for equine stomach tube
OD 5/8" and 3/4" (P/N HW170-006)
- 4 Smart charger battery pack for colic pump
- 5 Small PVC stomach tube (sold separately)
- 6 Medium PVC stomach tube (sold separately)
